

# Assembling Instructions

For 6 x 9 m Tent

**FIG4**

1#	161cm	10pcs	A		6pcs	∅4	10pcs
2#	193cm	10pcs	B		9pcs	∅6	4pcs
3#	214cm	12pcs	C		4pcs		100pcs
4#	161cm	10pcs	D				

# Guang da 20' x 30' Party/Event Tent

## Assembly Instructions

1. Completely unpack tent from all of the boxes and inspect all pieces. Compare to parts list shown on Fig. 4 (Separate Illustration Sheet)
2. Recommended to have 6-8 people to assemble tent to avoid damage.
3. Sort the poles by the number listed on them; All of the poles are numbered 1-4

### Assembly of roof structure: See Fig. 1

1. Slide #1 and #4 poles together; #4 poles are beveled on one end, this beveled end should slide into the #1 pole.
2. Start at one end of the tent, attach 2 of the #1/#4 assemblies in the center with a pole connector labeled "A" (Shown in photo below & on separate illustration sheet.) The pole assemblies should be directly across from each other.
3. Insert a pole labeled #2 into the same pole connector from step #2. (#2 pole should be perpendicular to the other poles previously connected.)
4. Insert other end of #2 pole in step #3 into pole connector labeled "B" (Shown in photo below & on the separate illustration instruction sheet).
5. Insert a #1/#4 assembly on each side of the pole connector from above. (The pole assemblies should be directly across from each other.)
6. Repeat Steps 3, 4, and 5 for remaining #1/#4 assemblies.
7. Once you reach the other end of the tent structure, you will need to use a pole connector labeled "A" (Shown in photo below & on separate illustration sheet.) to insert the #2 pole and the #1/#4 pole assemblies.
8. On the opposite end of the #1/#4 pole assemblies insert assembly into a pole connector labeled "A" on the corners and labeled "B" on all assemblies in the middle. Need to make sure that the hole in the longer end of the connector is pointed downward for connection to the leg pole.
9. Insert a #2 pole in between all pole connectors installed on step #8.
10. Unfold Canopy and put over roof frame structure
11. Install foot piece onto #3 pole at the end with a hole through it. You will need to line up hole in pole and hole in foot piece. Put bolt through the hole and install nut on the end of the bolt.
12. Place a #3 pole assembly at each pole connector on roof structure.
13. With a person at each pole connector on one side of the roof structure lift the roof structure and insert #3 pole into the pole connector. Allow structure to be supported by the leg poles.
14. Have each person from step #13 move to the opposite side of the roof structure and repeat step #13
15. Have several people hold tent securely to the ground and secure canopy to the roof structure.
16. IMMEDIATELY APPLY ANCHORS SYSTEM TO THE TENT TO AVOID DAMAGE!
17. Install sidewalls as needed.
