

Matters needing attention

Warning! !

- ① Do not overload.
- ② They shall not be used as lifting appliances, especially for carrying people.
- ③ It is strictly prohibited to use in the environment of instant recoil.
- ④ When the winch is working, it is forbidden to contact the wire rope, drum and gear. When working, cover the wire rope with a piece of soft fabric to prevent the wire rope from injuring people due to the huge retraction force when it suddenly breaks.
- ⑤ During operation, at least five circles of wire rope shall be ensured on the drum to prevent the wire rope from slipping.
- ⑥ When working, try to keep the steel wire rope perpendicular to the wheel drum to prevent the steel wire rope from wearing on the edge of the wheel drum.
- ⑦ It is recommended to use a moving pulley to relieve the hand shaking force when pulling heavy objects.
- ⑧ Before use, add oil to the outlet of gear and drum sleeve to save labor, wear and prolong service life.
